Department of Health and Human Services (DHHS)
National Institutes of Health (NIH)
Medical Officer Positions

Come join the nation's premier medical research agency, where we are making important medical discoveries that improve health and save lives! The National Institutes of Health has a number of **Medical Officer** vacancies in both the intramural and extramural programs. As a **Medical Officer** in intramural, you will be responsible for administering clinical, basic and independent research programs; analyzing, evaluating and generating scientific and clinical data; and conceptualizing new research direction and projects. As a **Medical Officer** in extramural, you will utilize your medical expertise to administer extramural research grants or contracts in a major program area. You will evaluate activities of funded investigators and make recommendations regarding the contribution of the research to the goals and objectives of the program.

The NIH has vacancies across the United States, including: Bethesda, Maryland; Baltimore, Maryland; Jackson, Mississippi; Hamilton, Montana; and Research Triangle Park, North Carolina.

Specialty areas of interest include but are not limited to the following:

- Addictive Medicine
- Allergy and Immunology
