

University of Michigan Job Posting 118916

The Department of Psychiatry at the University of Michigan is recruiting faculty to instructional (tenure) track positions in both early career (Assistant Professor) as well as senior (Associate Professor or above) positions to conduct research and lead research program in areas of interest that align with or complement research activities in the Department and its associated Comprehensive Depression Center. Applicants must hold a MD/PhD, MD, PhD or equivalent. The successful candidate will have a defined program of research and have evidence of success in obtaining external funding and publishing their work in high-impact journals.

The Department maintains a large, active portfolio of federally-funded research, and the Medical School and University provide a rich, dynamic academic environment. Current department research strengths include neuroimaging, genetics, longitudinal studies, child mental health, health services, substance use disorders and basic neurobiology relevant to neuropsychiatric disorders. This position will closely interface with the extensive clinical and research activities within the Department of Psychiatry, University of Michigan Comprehensive Depression Center and across the University of Michigan Medical School and university campus. Opportunities abound for the integration of clinical and neurobiological research with clinical delivery systems. While evidence of clinical competence and competence in clinical and didactic teaching is desirable, it is not required.

Candidates should submit a CV, a brief statement summarizing interests and objectives, and five references to:

Stephan Taylor, M.D. and Srijan Sen, M.D., Ph.D.
Search Committee Chairs
4250 Plymouth Rd. Rachel Upjohn Building – Rm 2551
Ann Arbor, MI 48109-5765
or through email to sftaylor@umich.edu.

The University of Michigan is a non-discriminatory, affirmative action employer and encourages women and minorities to apply. Upon acceptance of a contingent job offer, candidates are required to go through a background check, fingerprinting and pre-employment drug testing. Background screenings are performed in compliance with the Fair Credit Report Act.
