

McLean Hospital's LEAP Center

Post-Doctoral Fellowship in Mental Health Services Research

McLean Hospital, an affiliate of Harvard Medical School, is offering advanced training in clinical research focused on early psychosis to individuals who have already completed all requirements for PhD, MD, or other relevant doctoral degrees in epidemiology, psychiatry, public health, or other related fields. This training is supported by the National Institute of Mental Health (NIMH) through the Advanced Laboratories for Accelerating the Reach and Impact of Treatments for Youth and Adults with Mental Illness (ALACRITY) and Early Psychosis Intervention Network (EPINET) programs. Fellows accepted for enrollment enter the fellowship program for periods of up to two years, depending on the nature of their chosen areas of interest and the time required for the kind of project activity they identify in conjunction with a program mentor.

Training emphasizes the organization, delivery, utilization, and quality of care for individuals experiencing early phases of a psychotic disorder and on the methods needed for such work. The program provides experience in a well-funded research environment with excellent opportunities for faculty collaboration and publication. We have funding for two post-docs each year.

It is the policy of McLean Hospital to affirmatively provide equal opportunity to all qualified applicants for employment and existing employees without regard to their race, religion, color, national origin, sex, age, ancestry, protected veteran status, disability, sexual orientation, gender orientation, or any other basis that would be in violation of any applicable law or regulation. All aspects of employment including recruitment, selection, hiring, training, transfer, promotion, termination, compensation, and benefits conform to this policy in order to further the principles of equal employment opportunity and the spirit of affirmative action.

Applications are considered on a rolling basis and they should be emailed to:

Sandra Melanson
smelanson@partners.org

Applications should consist of the following items:

- Curriculum Vitae
- Statement of Purpose
- Two recommendations should be emailed to Sandra Melanson by the recommender

Applicants may include selected other material such as copies of one or two representative publications or working papers.

For further information, please contact: Dost Ongur, MD, PhD (dongur@partners.org)
